Primer of PsychoNeuroImmunology Research

Table of Contents

Editor-in-Chief and Section Editors	5
Contributing Authors	6
Forward	14
Preface	15
Section 1: Immunity	
Chapter 1: Adaptive Immunity	19
Chapter 2: Innate Immunity	27
Chapter 3: Tolerance and Autoimmunity	37
Section 2: The Microbiobiota	
Chapter 4: Introduction to the Microbiota and Tools for their Study	47
Chapter 5: Microbial Endocrinology: Neuroendocrine-Bacterial Interactions in Health and Disease	53
Chapter 6: Early Life Stress and the Microbiota	59
Chapter 7: Stress, the Microbiota and the Immune Response	65
Chapter 8: Gut Microbes and Behavior	71
Chapter 9: Gut Microbes-to-Brain Communication	81
Chapter 10: Beneficial Microbes, Immunity and Behavior	87
Section 3: Neuroinflammation	
Chapter 11: The Kynurenine (Kyn) Pathway and Neuroinflammation: The Confused Brain	95
Chapter 12: Psychoneuroimmunology of Traumatic Brain Injury	103
Chapter 13: Psychoneuroimmunology of Cerebral Ischemia	111
Chapter 14: Chronic Stress-induced Changes in Microglia in Determining Vulnerability to Mood Disorders	114
Section 4: Disease	
Chapter 15: Epigenetics and Chromatin Organization: The Impact of Stress and Adversity Over the Lifespan	127
Chapter 16: Neuroendocrine Regulation of Infectious Disease	135
Chapter 17: The Role of Pro-inflammatory Cytokines and Central Autonomic Nervous System in HIV Disease Management	141
Chapter 18: Stress and Multiple Sclerosis: Clinical and Animal Studies	147
Chapter 19: Cancer Metastasis: Promotion by Stress and Surgery	155
Section 5: Lifestyle and Behavior	
Chapter 20: Effects of Yoga on Mental and Physical Health Outcomes	165
Chapter 21: Physical Activity, Exercise and Immune Function	173
Chapter 22: Diet and Neuroinflammation	179
Chapter 23: Caregiving: Chronic Stress and Aging in Psychoneuroimmunology	185

Primer of PsychoNeuroImmunology Research

Table of Contents (continued)

Section 6: Mental Health

Chapter 24: Animal Models of Schizophrenia: Relevance of Neural-Immune Interactions	195
Chapter 25: Inflammation and Immunity in Schizophrenia and Related Psychotic Disorders: an Overview of Clinical Research	203
Chapter 26: Inflammation and Depression	209

Section 7: Aging

Chapter 27: Aging, Stress and Immunity	217
Chapter 28: Neuroinflammation and the Senescent Brain	223
Chapter 29: Aging and Sympathetic-Immune Interactions	231
Chapter 30: Psychosocial Influences on Immunity in Aging	239

Section 8: Sleep

Chapter 31: Excessive Daytime Sleepiness, Obstructive Sleep Apnea and Inflammation in Adults and Children	249
Chapter 32: Intermittent Hypoxia and Inflammation: Lessons from Animal Studies	255
Chapter 33: Effects of Sleep Restriction and Sleep Deprivation on Inflammatory Mediators in Humans	261
Chapter 34: Pro-inflammatory Cytokines in Sleep Regulation: Animal Models	267
Chapter 35: Immunological Aspects of Narcolepsy	273
Chapter 36: Sleep and Immunological Memory	281

Section 9: Pain

Chapter 37: Introduction to Pain and the Neuroimmune Interface	289
Chapter 38: Role of the Peripheral Immune System in Chronic Pain	297
Chapter 39: Immunomodulation as a Source of Sex Differences in Pain and Analgesia	305
Chapter 40: Stress-induced Priming of Chronic Pain States and the Role of Pro-inflammatory Processes	311
Chapter 41: Opioid-mediated Neuroimmune Modulation: the Central Battlefield	317
Chapter 42: Neuroimmune (and other) Mechanisms Involved in the Development of Chemotherapy-induced Neuropathy	325
